SUMMARY

Data Analyst skilled in Python, SQL, and Visualization tools, with experience turning complex datasets into actionable insights. Currently at Capgemini, supporting data-driven decisions through analysis, visualization, and automation. Strong in problem-solving, business understanding, and data storytelling, with a passion for using data to drive growth and efficiency.

SKILLS

- Programming & Tools: Python, SQL, Microsoft Excel, Power BI, Tableau, Pandas, NumPy, Matplotlib, Scikit-learn
- Data Analytics: Data Cleaning, Visualization, Statistical Analysis, Predictive Modeling, Dashboarding, Reporting
- Database Management: MySQL, MongoDB
- Automation & Scripting: Data Pipelines, API Integration, ETL Workflows
- Soft Skills: Business Understanding, Problem Solving, Communication, Data Storytelling, Collaboration

EXPERIENCE

Data Analyst | Capgemini

2025 – Present

- Extract, clean, and analyze large datasets using Python (Pandas, NumPy) and SQL to support client business initiatives.
- Build dashboards and visualizations in Excel and Matplotlib to track KPIs and performance metrics.
- Collaborate with cross-functional teams to identify patterns, trends, and improvement opportunities.

PROJECTS

Global Climate Change Dashboard

August 2025 – October 2025

- Built an interactive dashboard using Power BI and Tableau to visualize global temperature, CO₂ emissions, and deforestation trends.
- Integrated multiple public datasets (NASA, World Bank) for real-time analytics and visual storytelling.
- Designed KPI metrics and visual insights to highlight correlations between emissions and temperature rise.

Healthcare Integrated Supply Chain Management System

April 2024 - May 2024

- Developed a web-based platform using React, HTML, and CSS for managing healthcare supply chains.
- Automated product searches to help users locate nearby stores for essential healthcare items efficiently.

Water Resource Demand Forecasting and Strategic Storage Planning

August 2024 - October 2024

- Designed a forecasting model using time series analysis to predict water demand for agricultural needs.
- Conducted data preprocessing and exploratory analysis to identify patterns and optimize resource allocation strategies.
- Applied statistical methods to ensure data integrity and reliability for effective demand forecasting.

EDUCATION

BTech in Information Technology

June 2021 - July 2025

Pimpri Chinchwad College of Engineering, Pune

- 8.14 CGPA

CERTIFICATIONS

- C++ Certification: Demonstrated proficiency in C++ programming, further enhancing capabilities in developing robust software solutions.
- Data Science and Machine Learning with Python
- **Other Certifications:** Cloud Foundations.
- **Awards/Activities:** -IEEE Xtreme 24 Hours Hackathon: College Rank 4, Amazon Lex Chatbot: Developed a functional chatbot, GATE Exam Qualified.
